Solid Secure Straightforward

With Calipsa's integration between its False Alarm Filtering Platform and Tether Technology, Tether customers can now access Calipsa's industry-leading 90%+ false alarm reduction.

Summary

Calipsa and Tether have developed an integration to give Tether customers access to Calipsa's industry-leading False Alarm Filtering analytics. The integration will enable customers to connect Calipsa to cameras via Tether in just a few simple steps.

The integration is available from the Tether Community Marketplace for all video surveillance customers. By enabling Calipsa AI analytics on cameras on Tether, customers will be able to achieve significant levels of false alarm reduction - all without leaving the Tether platform.

How it works

Camera

Enable Calipsa AI verification on any camera with the tick of a box on the Tether platform.

Calipsa sends verified alarms back to Tether. False alarms are filtered out and true alarms are highlighted for human verification.

Tether

Calipsa

Tether forwards alarm to Calipsa via advanced API integration

Traditional Offerings

1. Enable Calipsa AI verification on any camera with the tick of a box on the Tether platform.

2. Tether forwards alarm to Calipsa via advanced API integration.

3. Calipsa's deep learning analytics analyse the alarms in real-time to determine whether the alarm is true or false.

4. Calipsa sends verified alarms back to Tether. False alarms are filtered out and true alarms are highlighted for human verification.

The benefits for video surveillance

Enjoy a range of technical, operational and performance benefits.

Reduce false alarms by over 90% with the addition of Calipsa False Alarm Filtering

Manage sites, cameras and false alarm filtering analytics all via Tether

Minimise the time and resource required to add video analytics to your cameras

Improve efficiency by minimising the number of alarms requiring verification

Facilitate the move from live monitoring to a cost-efficient event-based video model

Seamlessly integrate the latest AI technology into your business operations

About Calipsa

Calipsa is video analytics software with a difference. Using the latest deep learning technology, Calipsa's cloud-based False Alarm Filtering Platform removes over 90% of false alarms; recognising the cause of the alarm, filtering out any that are not caused by human or vehicle movement. As the global leader in false alarm reduction, whether you monitor, install or design CCTV, Calipsa is there to help you to better detect and prevent crime. Calipsa integrates seamlessly into existing monitoring operations; adding a critical layer of video analytics to enhance monitoring efficiency.

About Tether

Tether is an innovative solution for managing all types of physical security devices across multiple sites, through an intelligent cloud platform. The Tetherbox and Tether platform bring all devices into a single visual dashboard. The platform automatically detects and manages all cameras connected to the Local Area Network, stores images from selected cameras and provides a secure VPN to the cloud platform. Unlike competitors, Tether has an open API platform and will integrate with any other security device it comes across. As a result, customers will be able to add Calipsa to cameras on Tether in just one click.
